

Solution Requirements

Date: 05 July 2026

Project Name: Smart Lender

Team Id:

Max Marks: 4 Marks

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	Authentication	No login required for prediction	Low
2	Authorization Levels	Any user can access the prediction system	Low
3	External Interfaces	Uses trained XGBoost model (model.pkl) and Flask	High
4	Transaction Processing	Accept applicant details and generate loan prediction	High
5	Reporting	Display loan approval or rejection result	High
6	Business Rules	Predict loan based on applicant information and credit history	
7	Compliance	Protect user data and maintain privacy	Medium
8	Other	User-friendly web interface for loan prediction	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	Generate prediction quickly	< 2 seconds
2	Scalability	Support multiple users	100+ users
3	Security & Data Privacy	Keep user information secure	No data stored permanently
4	Reliability & Availability	Application runs without failures	99% availability
5	Usability & Accessibility	Simple responsive interface	Desktop & mobile friendly
6	Other	Easy maintenance and updates	Modular Flask application
